

Education:	Date	Qualification		
	1996	BSc Chemical Engineering, University of Oil and Gas, Moscow, Russia,		
	2011	Postgraduate Certificate in Business Administration, Open University, UK.		
Language Skill:		Reading:	Speaking:	Writing:
(Mark on a Score 1-5)	English	5	5	5
	Russian	5	5	5
Nationality:	Russian			
Key Qualifications:	<ul style="list-style-type: none"> ▪ Experience in chemical industry: petrochemicals, inorganics, performance ▪ Technology assessment through experience in the engineering and construction of a number of petrochemical plants ▪ Understanding of industry economics and competitive positioning ▪ Experience in refining industry: Reforming, FCC, Isomerization ▪ Experience in several countries in Central and Eastern Europe and the Middle East ▪ Experience of the design and engineering of refining/petrochemical plants ▪ Experience in commissioning/start-ups of new and revamped refining plants ▪ Experience in Technical Service assistance to a number of customers in Eastern Europe/Central Asia 			

Professional Experience:

2007-Present: Senior Consultant, Nexant Limited, London UK

- Managed a number of technical and market refinery due diligence engagements for Middle Eastern and FSU clients.
- Managed an Independent Technical Adviser project for a Chlor-alkali plant in one of the FSU countries.
- Managed a feasibility study and financial modelling of an ammonia-urea complex in Uzbekistan for a major European client
- Managed an Independent Technical Adviser project for a sulphuric/phosphoric acid complex in the Middle East
- Managed a Due Diligence project for an Acrylates complex in Saudi Arabia
- Performed a design review of an LAB plant in the Middle East
- Performed a technical evaluation of a novel process for production of olefins from methanol (MTO).

1996–2007: UOP

- **Regional Account Service Manager** – Managing customer relationships for an identified customer base and prospects for UOP products. Managing troubleshooting efforts for the assigned customers with the help of technical specialists as necessary insuring a timely and accurate assistance is provided. Performing project management of the commissioning activities for new plants. Aligning internally customer expectations with Sales for the assigned service agreement and non-service agreement customers. Managing and resolving services accounts receivables for the assigned customers as identified by collections. Tracking the cost and man-hours for the assigned enhanced and standard Service Agreements.
- **Field Operating Services** - Field checkout and start-up activities at refining/petrochemical sites. Comparing project specifications to actual process installations and evaluating their adequacy. Issuing punch-lists, mass balance, chemical injection calculations, field reports. Training international clients on control schemes and unit operations.
- **Process Design Engineer** - Worked on a number of basic engineering and detailed design projects. Production of Project specifications for the Schedule A package. Evaluation of hydraulic and heat and weight balance data, control schemes, and shutdown systems for consistency and correctness. Cross checking of equipment specs, Piping and Instrumentation Diagrams (P&IDs), Process Flow Diagrams (PFDs), and Material Selection Diagrams (MSDs) for consistency.
