cffinlay@btinternet.com

Key Achievements

- ★ Developed Schlumberger's process safety and integrity management system and rolled it out to all producing assets world-wide, achieving 80% compliance within two years.
- ★ Created, from scratch, Schlumberger's competence assurance system for production facilities professionals, boosting job satisfaction, and slashing attrition rates from 9% to 3%.
- ★ Presented with the Schlumberger Chairman's Award for successful governance of a field reactivation project in Colombia.

Employment

Principal Facilities Consultant

Thyssenkrupp

March 2015 to May 2016

Reason for leaving - company downsizing because of low commodity prices

- ★ Directed an international due diligence study of the world's largest scale carbon capture and storage project, exceeding stakeholder expectations of quality, cost, and schedule.
- ★ Led the preparation of a dozen proposals for engineering studies ranging from 400 to 10,000 hours, covering feasibility through to FEED stages.
- ★ Led several HAZID and HAZOP studies, of onshore oil and gas facilities, exceeding client expectations of study duration and quality.

Principal Engineer

Schlumberger

October 1993 to December 2014

Reason for leaving - overseas relocation of divisional headquarters

- ★ Corporate governance of oil and gas assets, producing over 200,000 barrels of oil equivalent per day, in China, Colombia, Ecuador, Malaysia, Romania, Russia, and the USA.
- ★ Led the assessment of hydrocarbon resources, equipment, processes, people, and infrastructure, ensuring that investment risks were aligned with reward.
- ★ Achieved all key performance indicator targets relating to population mentoring, diversity, promotions, flagging of high value staff, and succession planning.
- ★ Directed the concept selection phase of a key offshore gas condensate development in Saudi Arabia, organising and facilitating the workshops, bringing together surface and sub-surface disciplines, and delivering the concept selection report.
- ★ Directed Schlumberger's safety and loss prevention business, providing international class HAZID and HAZOP leadership services, with accountability for group profit and loss, staff recruitment, performance appraisal, and development.
- ★ Negotiated a world-wide agreement, with Shell, to provide their HAZID and HAZOP leadership and training, securing revenue of over £2 million.
- ★ Led the multiphase flow modelling business, managed major consultancy projects, trained clients, supported software sales and users.
- ★ Increased oil production, by 3%, of the Mokoko Abana field for Pecten Cameroon, receiving a letter of commendation from the client.

Qualifications

- ★ Project Management Professional
 - ★ Chartered Engineer
 - ★ Corporate Member of the Institution of Chemical Engineers
 - ★ Upper Second Class BSc. Honours Degree in Chemical Engineering from the University of Strathclyde
-
